

# Welcome to MinacNed

the association that brings Nano to Society

MinacNed membership package

partner in  nano4society

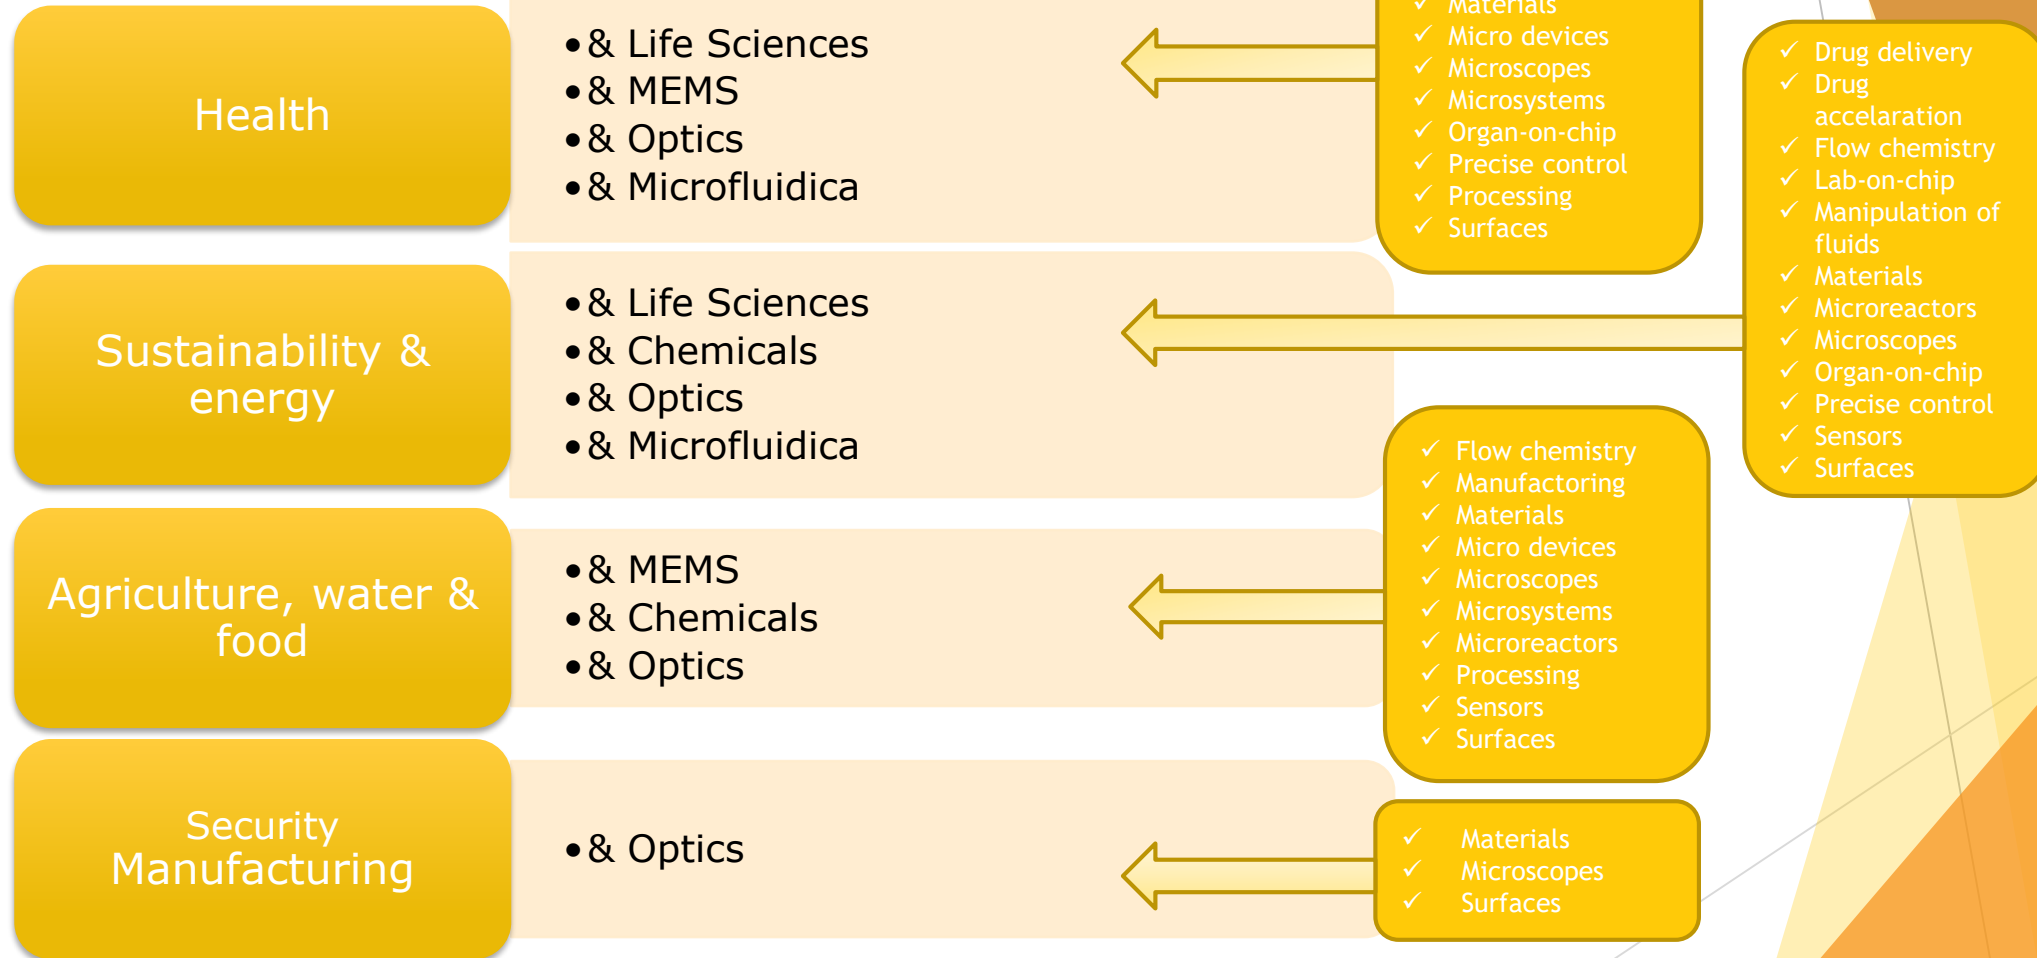

# About MinacNed

- ▶ MinacNed is a trade association with the aim of strengthening economic activity based on microsystems and nanotechnology. The members consist of research institutes, the manufacturing industry, suppliers, integrators and end-users of products and services that are made possible by, or make use of, micro and/or nanotechnology.
- ▶ The core activities of MinacNed contribute to providing a platform for sustainable economic and social value creation and the provision of an ecosystem for researchers, entrepreneurs and policy makers. This platform is created by organizing events and the international MicroNanoConference for our members.

# MinacNed

- ▶ MinacNed as a trade association
  - ▶ representative of her members towards stakeholders, politics and public opinion
  - ▶ within which the ecosystem can network excellently; where social challenges and enabling technologies meet
- ▶ MinacNed as a knowledge authority
  - ▶ for members, SMEs, politicians, talents and stakeholders
- ▶ MinacNed, connection between industry and science
  - ▶ with other micro and nano related international and national (branch) associations & partners
  - ▶ subsidy and financing options: Public Private Partnerships

# Topics & enabling technology

# MinacNed Proposition for members

## 1. Encourages innovation with and for members

- ▶ Ecosystem where members, companies, knowledge institutions and government can work together optimally to realize innovations
- ▶ Knowledge sessions & cluster events for its members
- ▶ Platform for consultation and cooperation between members
- ▶ Possibility to realize innovations together with members (knowledge institutions & companies)

## 2. Network

Connection with (inter)national industry-related networks, partners and government

- ▶ Access to a wide network of experts
- ▶ International innovative and match making missions to stimulate international business opportunities, innovation missions
- ▶ Connection with public-private partnerships

## 3. Leading member base

The strong players in the market are connected

- ▶ Participation of all enabling technologies
- ▶ All major knowledge institutions are members and make knowledge available to MinacNed network

# MinacNed

## Areas of activity

- ▶ Visibility
  - ▶ Provide insight into PPPs, Calls, etc.
  - ▶ Website
  - ▶ From start-up to scale-up
- ▶ Networking in the ecosystem
  - ▶ Collaboration in R&D
  - ▶ Exchange of knowledge / experience in business development
  - ▶ Development of innovation opportunities in the value chain
- ▶ Public interest
  - ▶ Representation of the community
  - ▶ Influencing public policy and public opinion on specific issues
- ▶ Talent
  - ▶ Employees and education

# MinacNed iMNC

The annual international MicroNanoConference is organized by MinacNed.

iMNC is the conference where science meets industry, where problems can find a solution and trends, challenges & new technologies in microsystems and nanotechnology are highlighted!

▶ Your benefits:

- ▶ Discounts on the participation in workshops
- ▶ Discount on table-top stands sponsorships
- ▶ Discount on visitor entrances
- ▶ Be a sponsor
- ▶ Be part of the program committee
- ▶ The benefit varies between €50,- for access and between €250 and €1500,- as a participant.

More information iMNC

# nano4society

**nano4society = MinacNed & NanoNextNL**

- ▶ MinacNed and NanoNextNL work together in the nano4society program
- ▶ Scientific board NanoNextNL
- ▶ Companies, start-ups, research institutions MinacNed

**nano4society**

- ▶ Grant application government and top sectors
- ▶ Grant application from European government

**Companies and science reinforce each other in the nano4society ecosystem**

# FHI services in MinacNed membership

MinacNed is affiliated with FHI, federation of technology branches. This cooperation provides us extra services.

## **These services concern:**

- Legal support
- HRM-support
- Business support services
- Model agreements, general term and conditions, supplier agreements
- Workshops
- Market information
- [Stichting RTA](#)

For more information about the services of FHI please read [Roadmap FHI](#)

# MinacNed story

Micro- & Nanotechnology enables us to come up with new solutions for social challenges. The chain of broad and international collaborations result in added value for people and society.

That is why we have united ourselves in the trade association MinacNed. We believe in the importance of technology and cooperation to be able to realize and solve economic and social issues such as medical and technical applications, sustainable solutions for energy, food and water.

This chain of broad and international collaborations result in added value for people and society. In addition, this also results in extra economic activity for the parties involved.

We bring parties together with network events and share knowledge with SMEs, politics and talents for the future to accelerate the developments of technology and international markets.

We also work together to bring the potential of our technologies to the attention of, among others, SMEs and (inter)national branches, partners in order to increase the total market for our products.

By working together, we will be able to spread our capabilities worldwide and realize economic activities.

# Membership

The membership fee of MinacNed will be proportionally charged for an organization that becomes member during the current year, on the condition that the organization is a member in the subsequent year as well. When the membership is prematurely ended, then the organization authorizes MinacNed to collect the remaining dues.

Please send the completed form to the MinacNed secretary, attn. [Nynke Minnema](#) Branche manager MinacNed.
